

Axidian Privilege

Privileged Access Management Solution for Business Continuity and Compliance

Centralized access management

Assign, suspend, revoke permissions and define access policies centrally.

Reduced number of privileged accounts

Discover unmanaged, forgotten, and redundant accounts to reduce your potential attack surface.

Credential storage

Keep privileged credentials in a centralized repository and perform regular checks of passwords and SSH keys.

Password and SSH key rotation

Set the rotation schedule, customize password complexity, roll back a password or key to restore a target resource.

Built-in single sign-on

Transparent access to resources. App-to-app password management.

Secure remote and third-party access

2FA for enhanced security; scheduled access; access upon arrival; control of file transfer.

Built-in multi-factor authentication

Password +TOTP in app, password +OTP via email, push notifications, PKI.

Incident investigation

Text logs, video recording and screenshots of privileged sessions.

Compliance with local and international regulations

ISO 27001

PCI DSS

HIPAA

GDPR

NCA ECC

SAMA

CITC-CCRF

SEBI

DORA

ISA/IEC 62443

And others

The capabilities that stand out are an SSO module that connects to any client application plus 2FA which is supported out of the box without any third-party applications needed. The base code of Axidian Privilege server is lean and designed for easy integration into both legacy and new architecture. Also on the plus side is a thoroughly modern interface and UX design which older rivals in the market could take note of.

Why choose Axidian Privilege:

- >> **Built-in MFA and SSO at no extra cost**
- >> **Wide choice of authentication methods**
- >> **Agentless architecture**
- >> **Two transparent licensing models**

By choosing Axidian Privilege, your organization gains the confidence to protect, manage and monitor privileged accounts efficiently, reducing security risks and ensuring compliance with industry regulations.

Customer success cases:

Nurol

- Finance • 100+ employees

- >> Passwords are kept secret from admins
- >> 2FA is enforced for privileged accounts
- >> Full visibility over the actions of IT admins

Ministry of Latvia

- Government • 200+ employees
- >> Video and text recordings of privileged sessions for transparency
- >> Passwords are kept secret from administrators
- >> Granular privileged access policies, defining users, accounts, accessible resources, and the duration of access

Access Protocols:

RDP
 SSH
 HTTP(s)
 Telnet
 SFTP
 SCP
 PostgreSQL
 Any protocol via client publication

Privileged account search and password management

Windows
 Linux
 Active Directory
 DBMS (MS SQL, PostgreSQL, MySQL, Oracle, etc.)
 Cisco IOS
 Inspur BMC

Supported user directories:

Active Directory
 Open LDAP

Remote access technologies:

Microsoft RDS
 SSH Proxy
 RDP Proxy
 PostgreSQL Proxy

Supported deployment platforms:

Windows Server 2019–2022
 Debian 11
 Debian 12
 Ubuntu 22.04
 Ubuntu 24.04
 Alt server 10
 Alt server 9
 Other operating systems that meet the requirements

Distributeur à valeur ajoutée

VOTRE PARTENAIRE TECHNOLOGIQUE POUR DES INFRASTRUCTURES IT SÉCURISÉES ET PERFORMANTES

EXPERTISE
Des solutions adaptées à chaque environnement

CONFIANCE
Un partenaire fiable à vos côtés

PERFORMANCE
Des infrastructures sécurisées et évolutives
