

SecPoint® Cloud Penetrator™

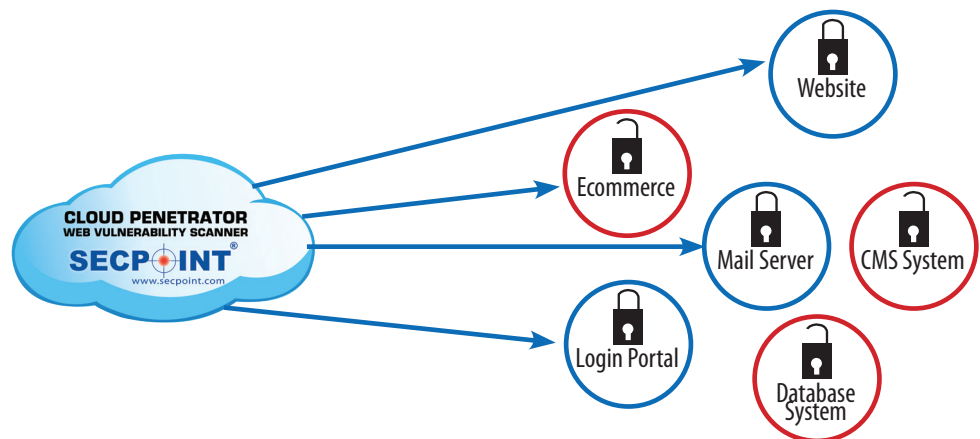

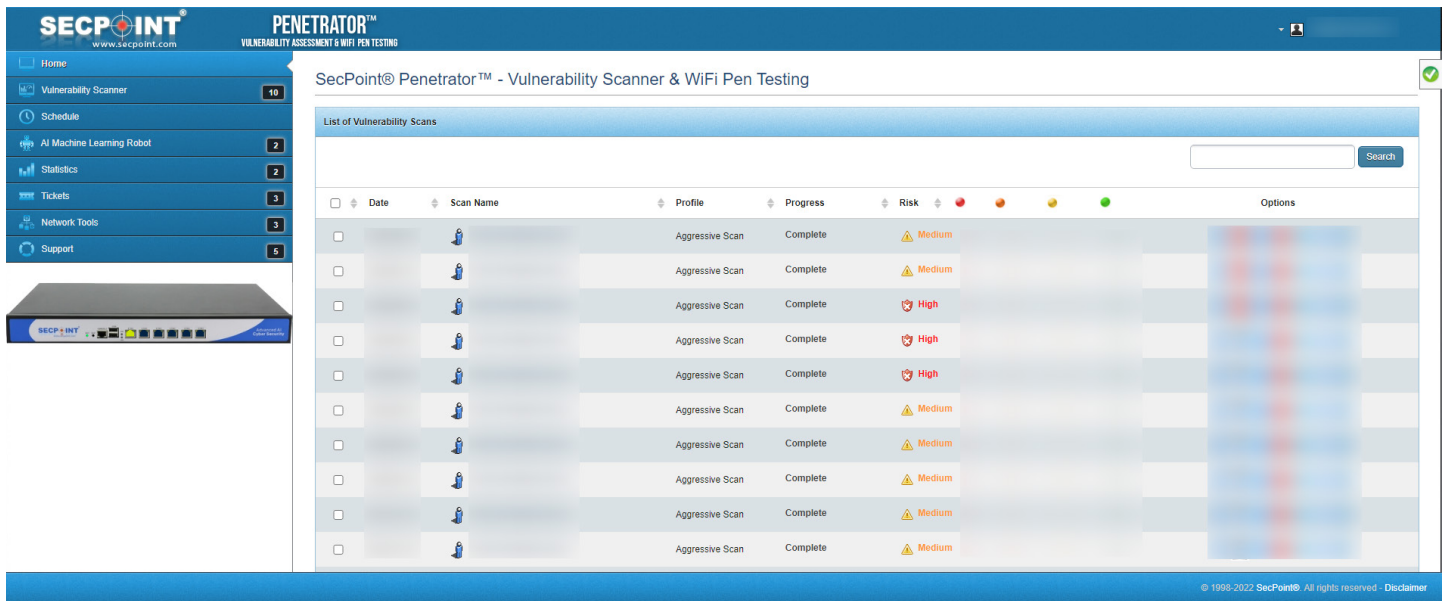

- Web Vulnerability Scanner
- Lethal Attack Crawler Blind SQLi
- Remote Command Execution (RCE)
- Scans Websites, Webshops, Firewalls
- No Software Installation Required
- Data Leak Detection & Geo Mapping
- 34 Vulnerability Scan Profiles
- Over 146,000+ Vulnerability Checks
- Detection of 1,400+ Web Shells
- Reflected & Stored XSS Detection
- Professional Reporting PDF, HTML, XML & XLS
- Advanced AI for High Accuracy
- IoT & SCADA Vulnerability Scanning
- Automatic Scheduled Scans

**Secure your website and public IPs before it's too late.
Experience the pinnacle of automated web vulnerability scanning.**

Modern automated hacking tools can compromise your online presence, network, and even global activities within minutes.
Promptly identify and address your vulnerabilities to fortify your defences.

Vulnerability management is key to any security strategy

Vulnerability Management

Introducing the SecPoint® Cloud Penetrator™: a cutting-edge cloud vulnerability management and penetration testing tool designed to scan both your online network and your Cloud infrastructure. With its capability to be accessed from anywhere, it stands as a potent and astute online security assessment solution.

No Software Installation Required

Simply access the SecPoint® Cloud Penetrator™ from any web browser worldwide. Stay informed effortlessly with notifications upon the completion of scans.

Powerful Vulnerability Scanning

Leveraging an exhaustive vulnerability database and employing advanced scanning techniques, the SecPoint® Cloud Penetrator™ ensures you maintain a strategic edge over even the most adept and sophisticated attackers.

Blind SQL Injection & Web Shells Detection

Uncover sought-after vulnerabilities that crafty attackers exploit, like advanced blind SQL Injection. Determine if you've been compromised and if a web shell lingers on your system.

SecPoint® Cloud Penetrator™

Web Vulnerabilities Scanning

Professional Reporting

Reports are available in multiple professional editions and can be easily downloaded in both PDF & HTML formats.

System vulnerabilities are categorized into three risk tiers: high, medium, and low. Each entry provides the name, details of the vulnerability, and its recommended solution.

Beyond the detailed findings, the report concludes with an assessment of the overall security posture of the scanned target system. Additionally, an executive summary is crafted especially for management-level review, encompassing both textual & graphical insights derived from the scan results.

Scalable and Upgradeable

Enjoy the flexibility of our licensing with full scalability to match your ever-changing needs. We offer a range of bundles, starting from just 1 IP address, and we're continually evolving to meet demands.

34 Scanning Profiles

Select from diverse unique scanning profiles tailored to your specific requirements. Boasting market-leading vulnerability coverage, we provide highly accurate detection of threats, including Cross Site Scripting and SQL Injection vulnerabilities in web applications.

Ready to Go

Access your account from anywhere in the world to set up and monitor your vulnerability scans.

Professional Skilled Support

Our support is unparalleled, boasting the fastest reply and response rate in the industry. Trust in our highly skilled 24-hour support team to assist you. Track your support ticket status conveniently via the Support Center.

Key Features

- **Accurate**
We prioritize the security of all information to ensure its confidentiality, integrity, and availability. With market-leading vulnerability coverage backed by the CVE Databases, we offer highly precise detection of threats like Cross Site Scripting and SQL Injection vulnerabilities in web applications.
- **Scalable**
Our flexible licensing is fully scalable, adapting to your current demands. We support the scanning of all network technologies and are constantly evolving to meet emerging needs.
- **Automated**
Enjoy the convenience of fully automated scans with scheduling features. Receive timely email alerts, and benefit from automatic and immediate updates to vulnerability checks and other features through our dedicated update service.
- **Highest Security Confidence**
The SecPoint® Cloud Penetrator™ ensures the safety of your online activities by offering the most precise and comprehensive vulnerability scanning in the industry.
- **Centralized Administration**
Log in from anywhere in the world. Utilize our remediation ticket system and verification scanning to monitor mitigation. Our system also offers flexibility for grouping various network components.
- **Analysis**
Experience highly accurate vulnerability identification, paired with the elimination of false positives. Receive customized reporting in XML, PDF, and HTML formats.
- **Scanning of Popular CMS**
We support scans for widely-used CMS platforms such as WordPress, Drupal, Magento, Shopify, and Umbraco.

Key Benefits

- **Improve Accuracy**
Benefit from our extensive vulnerability database, updated daily, ensuring minimal false positives.
- **Ease of Deployment & Use**
Get up and running immediately with our user-friendly and intuitive web interface.
- **Reduced Cost**
With our cloud service deployment, only operational expenses are incurred, ensuring cost efficiency.
- **Support**
Experience uninterrupted phone & email support, with security experts available
- **Licensing**
Obtain IP Scanning licenses and have the option to upgrade as your needs for larger IP coverage grow.
- **Lethal Attack Technology**
Detect critical threats such as high-risk SQL Injection, Blind SQL Injection, Remote Code Execution, & Information Leak vulnerabilities.

SecPoint® Cloud Penetrator™

Web Vulnerability Scanning

Cloud Penetrator™ Benefits >>

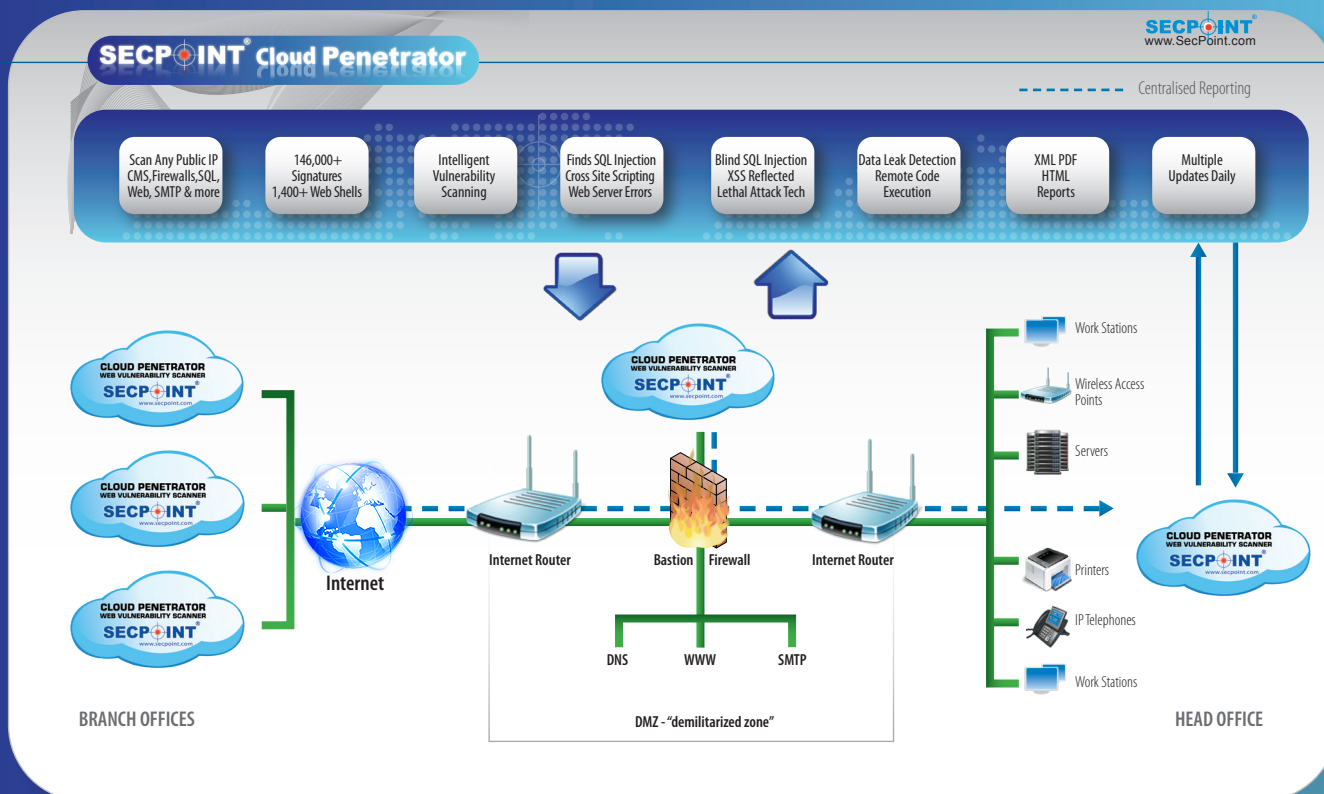

CLOUD PENETRATOR
WEB VULNERABILITY SCANNER
SECPPOINT

You get the following benefits:

- | | |
|---|--|
| ✓ Identify Vulnerabilities on your online system network. | ✓ A solution to fix the found vulnerabilities |
| ✓ 146,000 Vulnerability Checks | ✓ Data Leak Detection |
| ✓ 1,400 Web Shells Detection | ✓ Automated Vulnerability Scanning |
| ✓ Vulnerability Scanning Pen Testing | ✓ Application Security Vulnerability Assessment |
| ✓ Professional PDF, HTML, XML and XLS Reporting | ✓ Clear Solutions to fix the found vulnerabilities |
| ✓ User Friendly web-interface | ✓ Denial of Service - DoS Tests |
| ✓ Application Security & Authenticated | ✓ SaaS Software as a Service |
| ✓ WAS, Web Application Scanning, SSL & TLS Checks | ✓ 34 Vulnerability Scan Profiles |
| ✓ SQL Injection & Blind SQL Injection | ✓ Lethal Attack Technology |
| ✓ XSS Cross Site Scripting & Reflected XSS | ✓ Remote Code Execution (RCE) |

Are you ready
for the next step?
