

# Axidian Privilege

## Privileged Access Management Solution for Business Continuity and Compliance

### Centralized access management

Assign, suspend, revoke permissions and define access policies centrally.

### Credential storage

Keep privileged credentials in a centralized repository and perform regular checks of passwords and SSH keys.

### Built-in single sign-on

Transparent access to resources. App-to-app password management.

### Built-in multi-factor authentication

Password +TOTP in app, password +OTP via email, push notifications, PKI.

### Reduced number of privileged accounts

Discover unmanaged, forgotten, and redundant accounts to reduce your potential attack surface.

### Password and SSH key rotation

Set the rotation schedule, customize password complexity, roll back a password or key to restore a target resource.

### Secure remote and third-party access

2FA for enhanced security; scheduled access; access upon arrival; control of file transfer.

### Incident investigation

Text logs, video recording and screenshots of privileged sessions.

## Compliance with local and international regulations

**ISO 27001**

**PCI DSS**

**HIPAA**

**GDPR**

**NCA ECC**

**SAMA**

**CITC-CCRF**

**SEBI**

**DORA**

**ISA/IEC 62443**

**And others**

The capabilities that stand out are an SSO module that connects to any client application plus 2FA which is supported out of the box without any third-party applications needed. The base code of Axidian Privilege server is lean and designed for easy integration into both legacy and new architecture. Also on the plus side is a thoroughly modern interface and UX design which older rivals in the market could take note of.

## Why choose Axidian Privilege:

- >> **Built-in MFA and SSO at no extra cost**
- >> **Wide choice of authentication methods**
- >> **Agentless architecture**
- >> **Two transparent licensing models**

By choosing Axidian Privilege, your organization gains the confidence to protect, manage and monitor privileged accounts efficiently, reducing security risks and ensuring compliance with industry regulations.

## Customer success cases:

### Nurol

- **Finance**
- **100+ employees**

- >> Passwords are kept secret from admins
- >> 2FA is enforced for privileged accounts
- >> Full visibility over the actions of IT admins

### Ministry of Latvia

- **Government**
- **200+ employees**
- >> Video and text recordings of privileged sessions for transparency
- >> Passwords are kept secret from administrators
- >> Granular privileged access policies, defining users, accounts, accessible resources, and the duration of access

## Access Protocols:

RDP  
SSH  
HTTP(s)  
Telnet  
SFTP  
SCP  
PostgreSQL  
Any protocol via client publication

## Privileged account search and password management

Windows  
Linux  
Active Directory  
DBMS (MS SQL, PostgreSQL, MySQL, Oracle, etc.)  
Cisco IOS  
Inspur BMC

## Supported user directories:

Active Directory  
Open LDAP

## Remote access technologies:

Microsoft RDS  
SSH  
RDP Proxy  
PostgreSQL Proxy  
Proxy

## Supported deployment platforms:

Windows Server 2019–2022  
Debian 11  
Debian 12  
Ubuntu 22.04  
Ubuntu 24.04  
Alt server 10  
Alt server 9  
Other operating systems that meet the requirements
