

Axidian CertiFlow

**Automate the lifecycle of digital certificates,
smart cards and USB tokens**

Centralized management of Public Key Infrastructure (PKI)

Strengthen the cybersecurity of your organization

- Centralized PIN policy enforcement
- Regular rotation of PIN codes
- Flexible role-based access model
- Compliance with Zero Trust Policy
- Monitoring of USB token usage on user PCs

Minimize manual overhead and reduce operational costs

- Automation of certificate issuance, renewal, blocking and revocation
- Automatic inventORIZATION and tracking of smart cards and certificates
- System event notifications
- Self-service portal for users

Simplify the workflow with e-documents

Sign and approve certificate forms and revocation requests using the internal e-document service. This improves process transparency and ensures compliance with regulations: employees must confirm each time they have received a certificate.

Accelerate incident investigation

Each certification authority (CA) has its own event log. Axidian aggregates PKI-related events in the admin console. For investigations, it is easy to generate a report using filters such as users, events, card types, dates, and service. Export the report for convenience.

Compliance with local and international regulations

ISO/IEC 27001 / 27002

NIST SP 800 Series

ISO/IEC 15408

IT Act India

eIDAS (EU 910/2014)

RBI

NCA ECC

PCI DSS

And others

Why choose AxiDian CertiFlow:

- >> **Seamless migration from legacy card management systems (CMS)**
- >> **A self-service portal for users & reduction of manual overhead**
- >> **Token-free digital signature, encryption and authentication**
- >> **Flexible role-based model for access control**

Customer success cases:

AB InBev • **Manufacturing** • **2800+ employees**

- >> Easy-to-use 2FA that is fit for a large manufacturing environment
- >> Effective management of hybrid smart cards and PKI, even in complex scenarios

Bankart • **Finance** • **200+ employees**

- >> The AxiDian CertiFlow Dashboard gives visibility over complex PKI processes
- >> Infrastructure administrators are notified on events related to digital certificate usage
- >> Policies are implemented for automatic management of PKI operations

Certification Authorities (CAs)

- Microsoft Enterprise CA
- CAmelot

CA Operations

- Obtain certificate templates
- Create and send out certificate requests
- Approve certificate requests
- Issue and renew certificates
- Suspend and revoke certificates
- Check certificate status

Smart cards and tokens

- Hardware smart cards and tokens
- Microsoft Windows NT Registry
- Microsoft Virtual Smart Card (TPM)
- Microsoft Windows Hello for Business
- AxiDian AirCard Enterprise

Hardware smart cards and tokens

- ACOS (ACS)
- eToken and ID Prime (Thales)
- Yubikey (Yubico)
- ePass (Feitian)
- Crescendo Series (HID)

Integration with infrastructure components

- MFA
- SIEM (syslog)
- API
- Mail (SMTP)
- Smart card printers
- IdM solutions
